Unemployment Rate Ranking  
Dionny McDonnell, Economist

Note: 2019:88  
August 13, 2019

## As of June 2019, 16 States Have a Higher Unemployment Rate than the Silver State

- Information from the Local Area Unemployment Statistics (LAUS) Program, produced by state agencies in cooperation with the Bureau of Labor Statistics, allows us to evaluate Nevada's unemployment rate relative to that for other states. The unemployment rate is the ratio of unemployed to total labor force. Labor force includes those who are employed and those who are unemployed but searching for work.
- Unemployment rate estimates are available since 1976. Nevada's all-time low unemployment rate stood at 3.8% in late 1998. This rate ranked 38<sup>th</sup> among the all-time lows for all states and the District of Columbia.
- As the recession of 2007 unfolded, Nevada's unemployment rate increased non-stop to 13.7% in late 2010, an all-time high. Over the course of the 2010-2013 period, the Silver State's jobless rate was the highest in the nation. As the labor market strengthened, the unemployment rate levels in the Silver State started to improve.
