**March 25,2022**

# Executive Summary

## Employment

- The total employment level in the state is 1,434,100.
- Nevada added back 6,300 jobs over the month but is up by 126,700 since February 2021, an annual increase of 9.7%.
- Las Vegas employment increased by 7,600 jobs (0.7%) since January 2022 and saw an increase of 116,400 jobs (13.0%) since February 2021.
- Reno employment had a decrease of 300 jobs (0.01%) since January 2022 but saw an increase of 10,000 jobs (4.1%) since February 2021.
- Carson City employment had an increase of 100 jobs (0.3%) since January 2022 and saw an increase of 900 jobs (3.0%) since February 2021.
- The state has the highest over-the-year employment growth rate ranking in the U.S.

## Unemployment

- The state's unemployment rate in February is 5.1 percent, down 0.1 percentage point from January 2022 and down 4.7 percentage points when compared to February 2021.
- The unemployment rates were 8.2 percent in the Las Vegas metro area, 4.3 percent in Reno, and 4.6 percent in the Carson area in February 2022.
- The state has the highest unemployment rate ranking in the U.S.
- In Nevada's counties, the lowest unemployment rate was in Eureka County at 3.1 percent, and Clark County had the highest rate at 8.2 percent.
- As of February 2022, veterans in Nevada have an unemployment rate of 7.3% (expressed as a 12-month moving average).
- All but one counties' unemployment rates declined significantly over the year with Clark County leading the way, down fourteen percent.

## Unemployment Insurance

- In February, 8,155 initial claims for unemployment insurance were filed in Nevada, a decrease of 4,453 claims, or 35.3 percent, from January when there were 12,608 claims.
- The number of regular program weeks claimed and compensated decreased from January, resulting in \$17.9 million in benefit payments, an decrease of 30.2 percent from the previous month.
- Nevada's Unemployment Insurance Trust Fund balance stood at 420,038,000 as of February 26, 2022. This compares to February 2021 when the balance was -160,649,000

## Visitor Volumes/Taxable Sales/Gaming Win

- The Reno area received 361,375 visitors in February 2022.

- The Las Vegas area received 2,766,100 visitors in February 2022.
- Gaming win in Nevada was \$1,078,761,266 in February 2022.
- Taxable sales in Nevada were \$6,513,146,350 in January 2022.

## Current Employment Overview

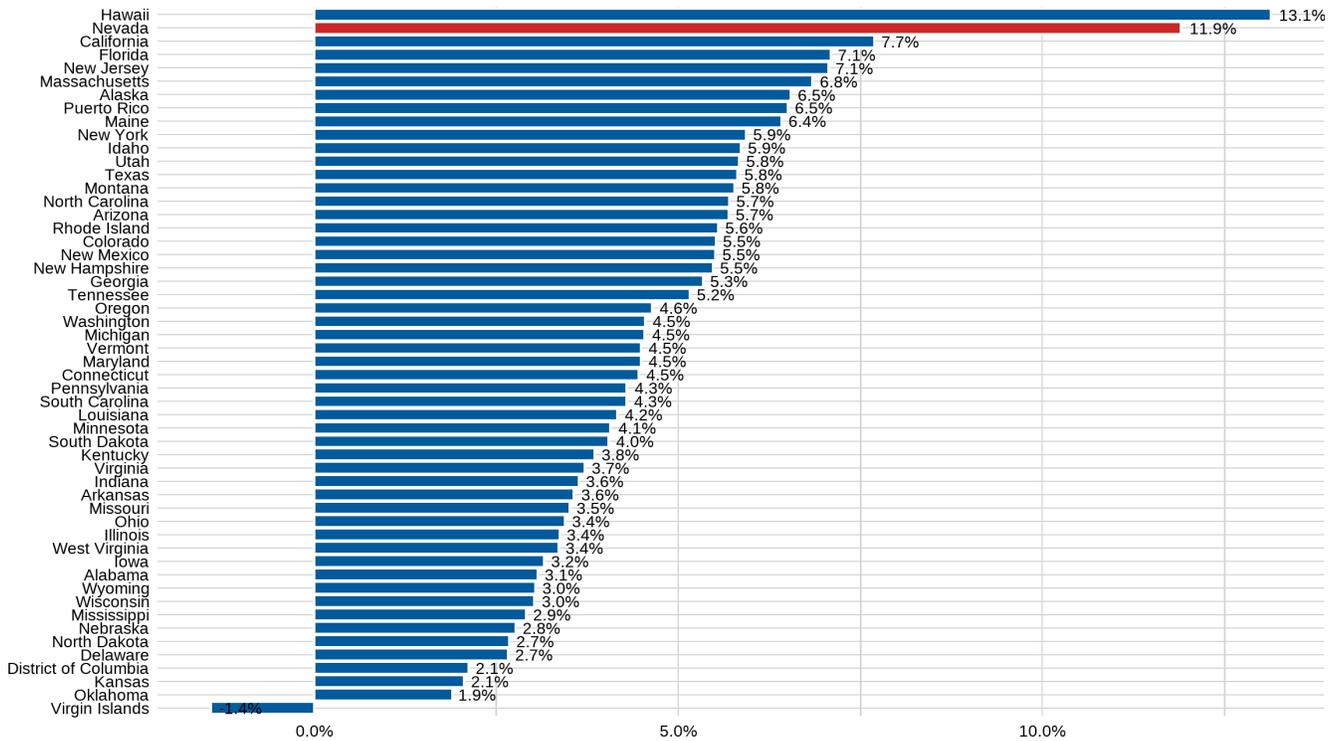

In February 2022, we remain on the path to recovery, but some areas of the state are still experiencing significant disruptions. The state's current employment level of 1,434,100 is roughly 99 percent of its February 2020 peak level. The state has recovered 329,000 jobs or roughly 95 percent of the jobs lost during the pandemic. In each of the last 12 months, the state added jobs compared to the prior month, yet Nevada remains 15,500 jobs below its February 2020 level. Nevada added 13,100 unadjusted jobs over the month in February, slightly better than monthly average of 11,100 for the 12 months preceding this.

## Current Unemployment Overview

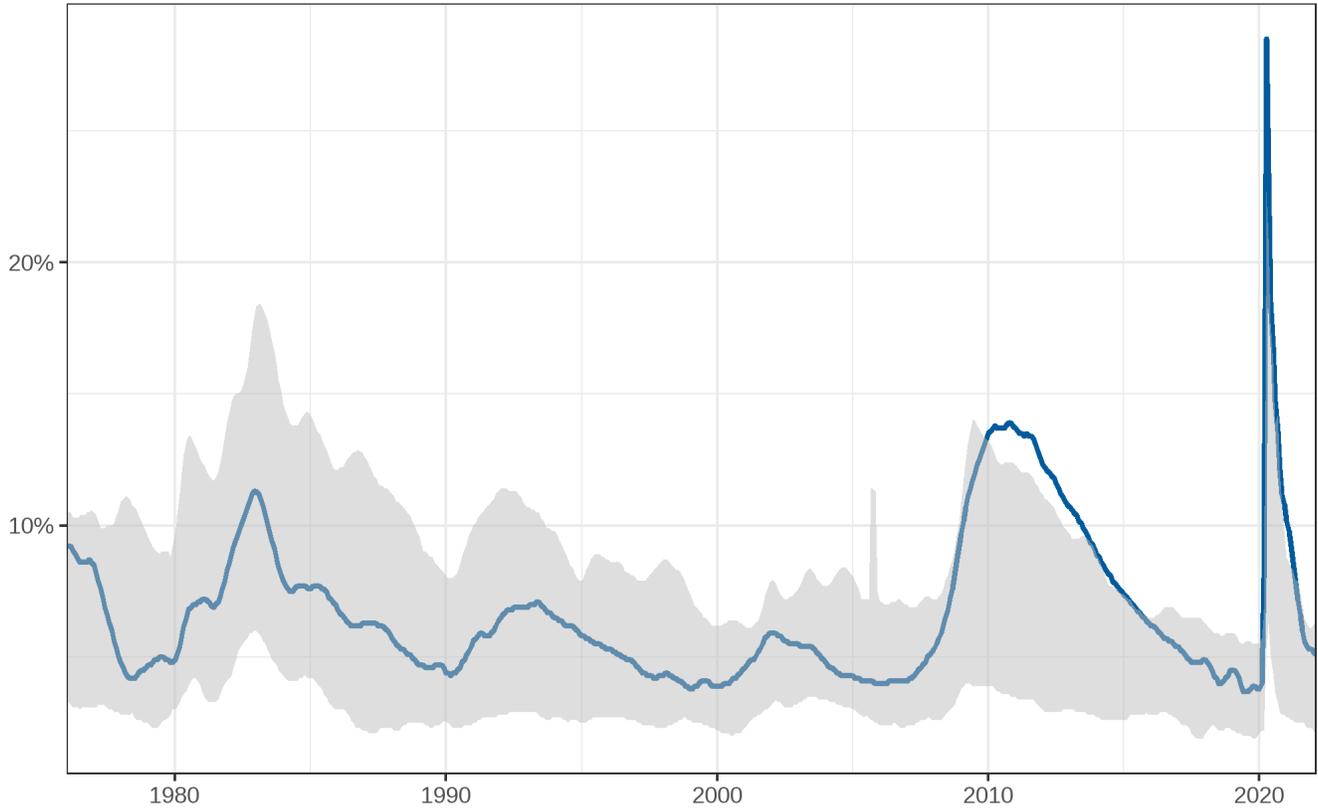

The state's February 2022 unemployment rate decreased by 0.1 percentage point from January's revised level while the national rate declined by 0.2 percentage point, leaving the gap between Nevada and the United States at 1.3 percentage points. The state's unemployment rate has dropped 23.4 percent since April. In February 2020, the month before the virus outbreak, the Las Vegas MSA's jobless rate was just 3.6 percent. In February 2022, Las Vegas, the state's largest population center, has an unemployment rate of 8.2 percent, nineteenth highest in the nation among large metro areas. Las Vegas' share of unemployed workers remained stubbornly high despite a notable bump in tourism according to the Las Vegas Convention and Visitor's Authority. Las Vegas' unemployment rate decreased from 9.3 percent in January.

Unemployment rates were lower in February in 36 states and the District of Columbia and stable in 3 states, the U.S. Bureau of Labor Statistics reported today. Every state and the District had jobless rate decrease from a year earlier with an average decrease of 1.7 percentage points. The national unemployment rate, 5.2 percent, was down 0.1 percentage point over the month, but was 3.2 percentage points lower than in February 2021.

## Unemployment Rate Ranking February 2022 (seasonally adjusted)

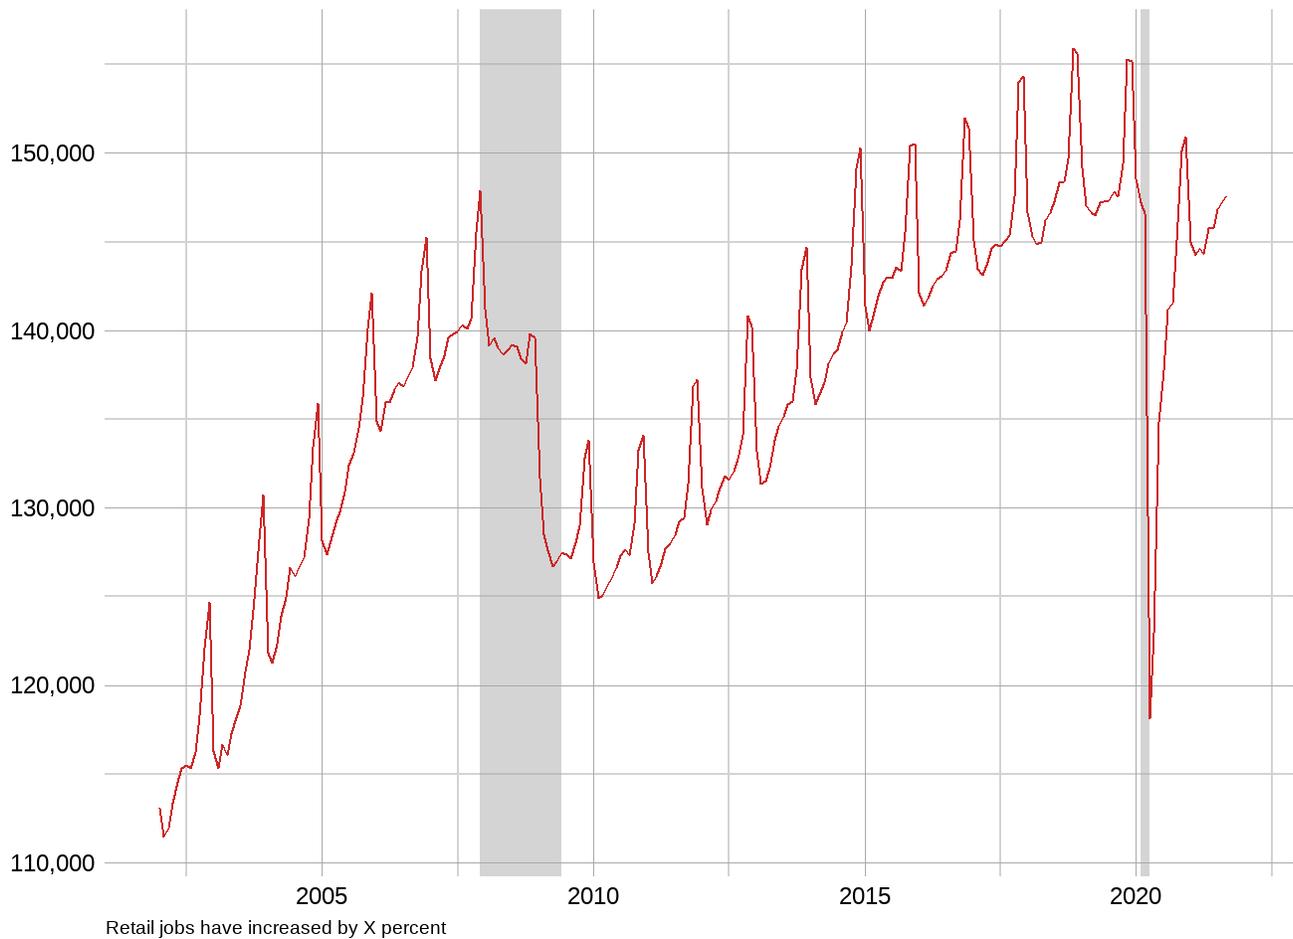

According to the BLS, Nonfarm payroll employment increased in all 50 states and the District of Columbia, in February 2022. The largest job gains occurred in California (+1.106 million), Texas (+832,200), and Florida (+530,200). The largest percentage increase occurred in Nevada (+9.7 percent), followed by Hawaii and California at 7.5% and 6.82% respectively. The lowest increases were realized in Alaska (6,700), Delaware (8,300), and South Dakota (8,600). On a percentage basis, those with the lowest increases were Alabama (1.7%), Delaware (1.86%), and Ohio (1.93%).

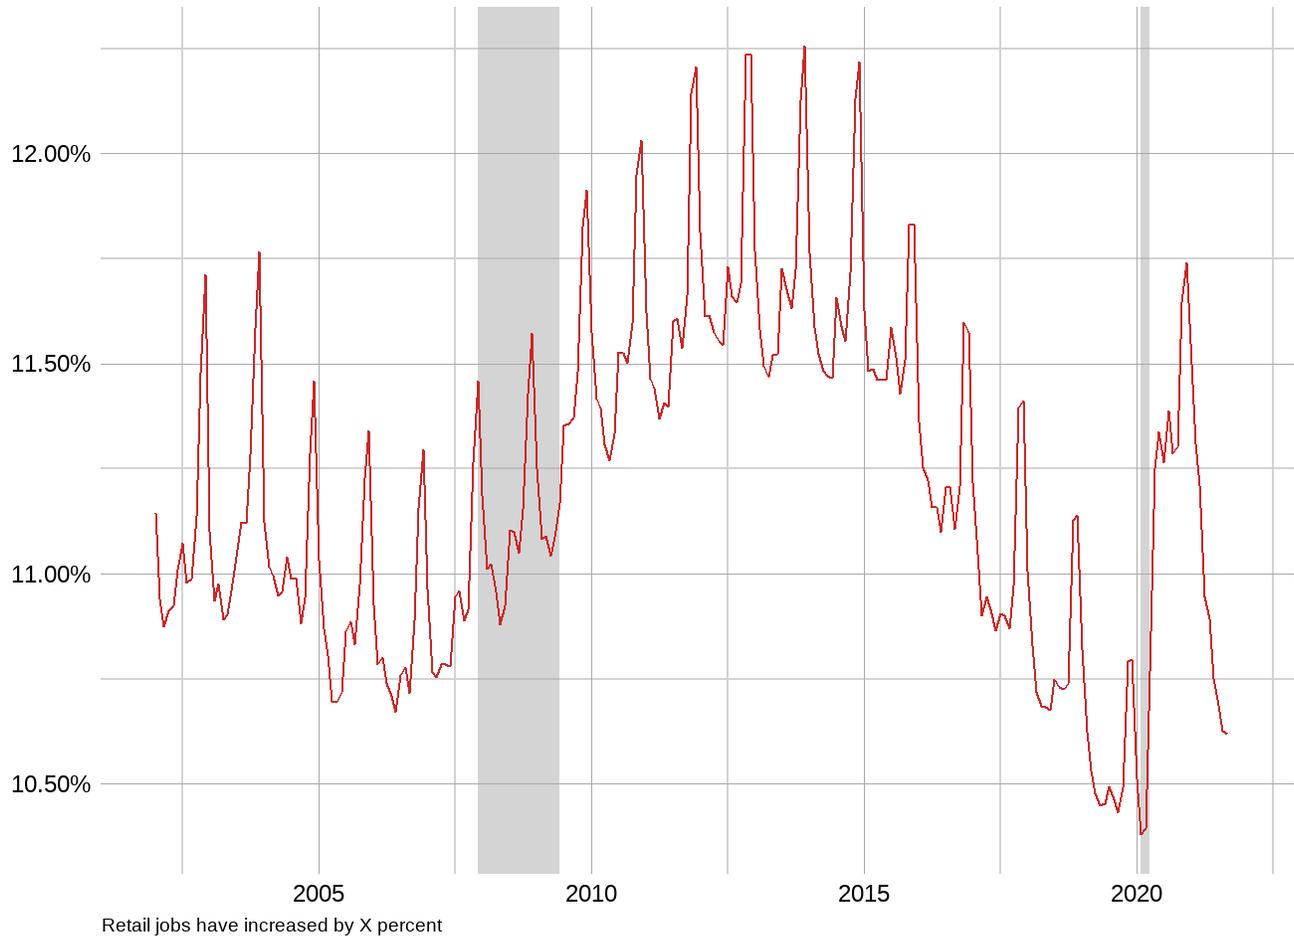

# Retail Trade

Retail trade is defined as those industries whose NAICS (North American Industrial Classification System) code starts with 44 or 45.

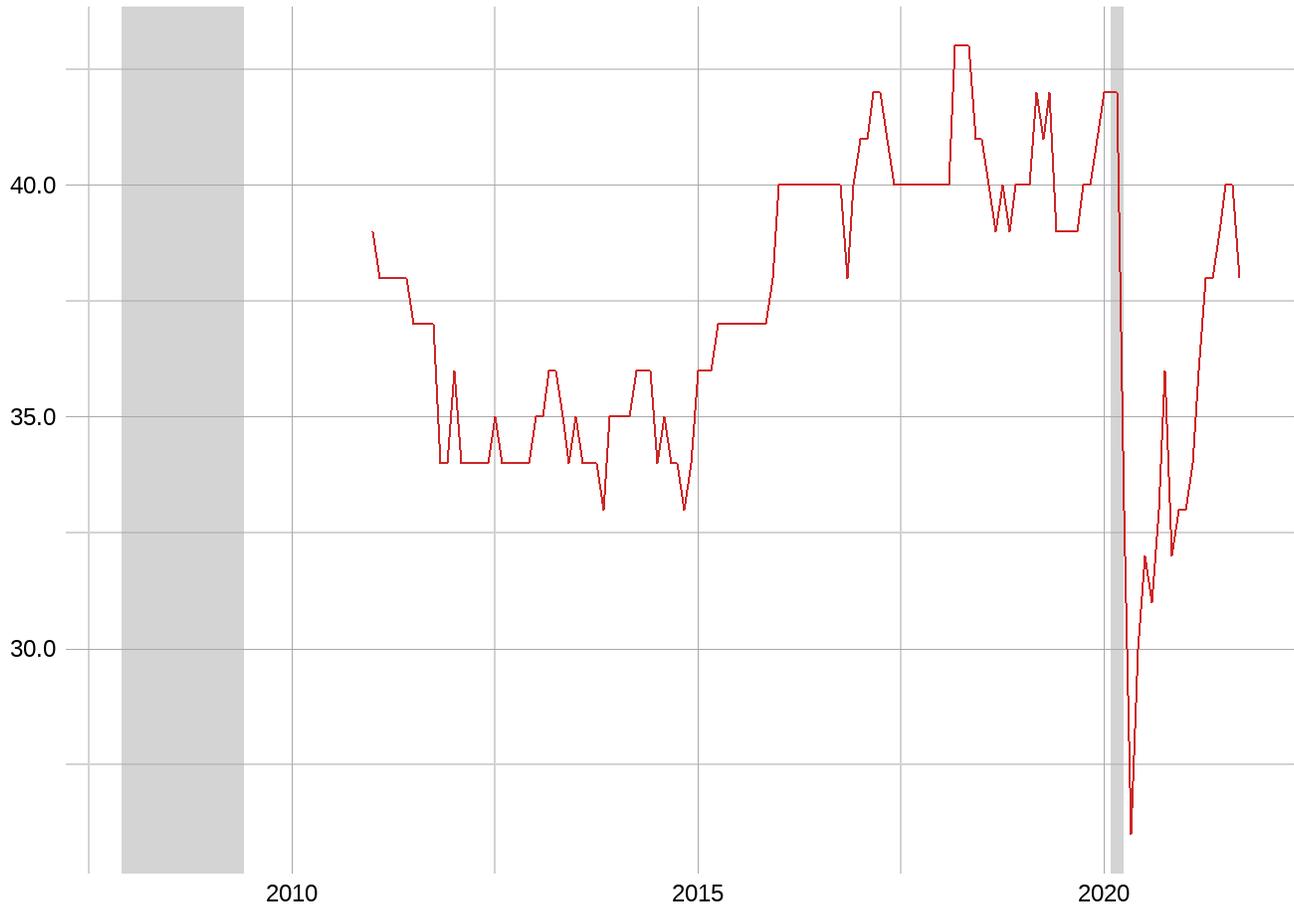

In the Silver State, employment in the retail trade industry reached its peak in November 2018 at 155,876 employed. With the outbreak of Covid-19, employment would decrease rapidly from 155,271 in December 2019 to 118,154 in April 2020. Since that time, employment in retail trade has risen to 147,600 as of September 2021. This translates to about 78% of the retail jobs lost during that time having now been recovered.

Retail employment as a percentage of total employment had been trending down from 2015 to 2020. Historically, the silver state has averaged 11.2 percent from 2011 to third quarter of 2021. The highest retail share of total employment was reached in December 2013 at 12.25% while the lowest point was February 2020 at 10.3%. As of September 2021, it stood at 10.6%.

For September 2021, Nevada ranked 38th in highest share of total employment attributed to retail employment at 11.8 percent. The states with the highest retail share of total employment were New Hampshire (15.8%), Mississippi (15.2%), and Maine (14.9%). The states with the lowest shares were District of Columbia (4.1%), Massachusetts (10.6%), and California (10.7%). For September 2021, the average share was 12.8%.

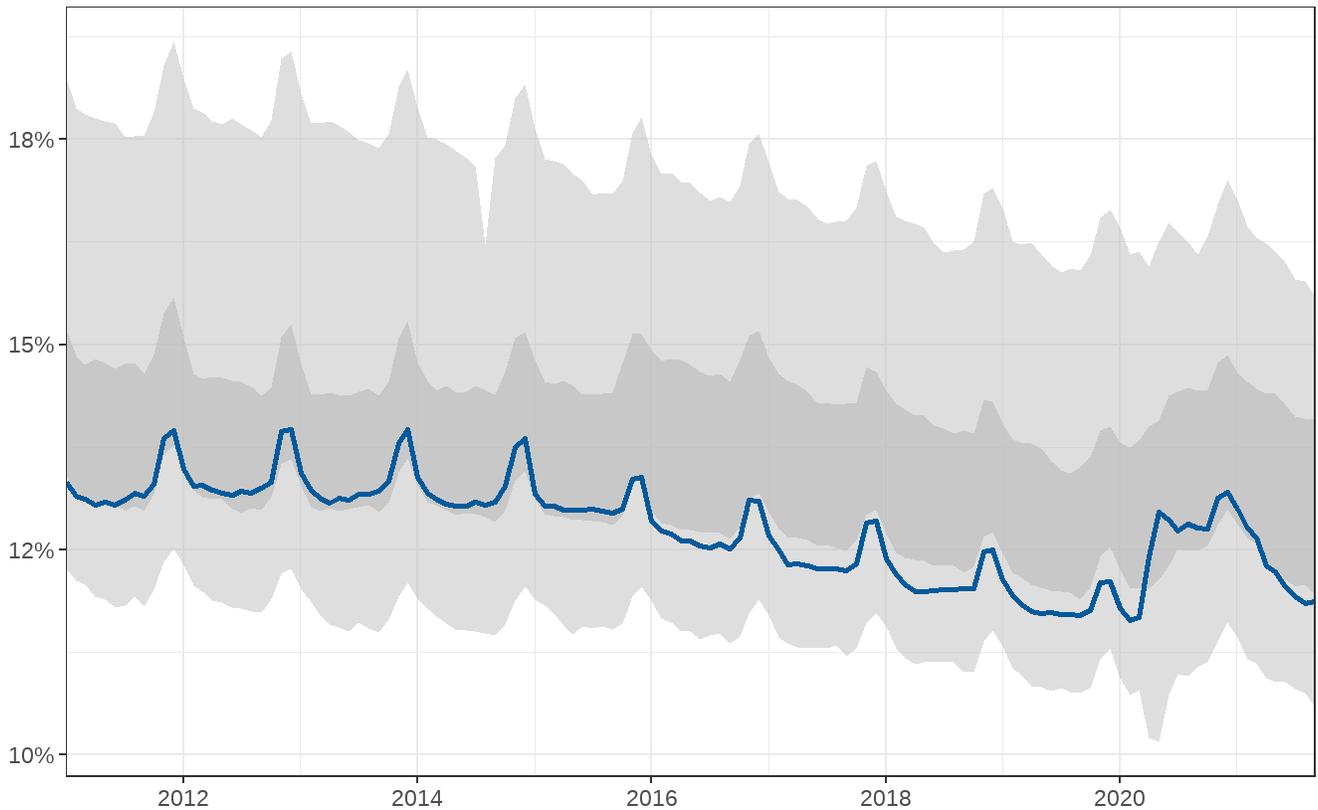

Nevada's rank in retail employment as a share of total employment

From 2011 to 2021, Nevada on average ranked 38 out of 50 when it comes to retail share of total employment. The highest ranking for the Silver State was 26 out of 50 in May 2020. The lowest ranking was 43rd and was for March to May 2018.

### Nevada's Retail Share of Total Employment Since 2011

<https://www.bls.gov/cew/downloadable-data-files.htm>

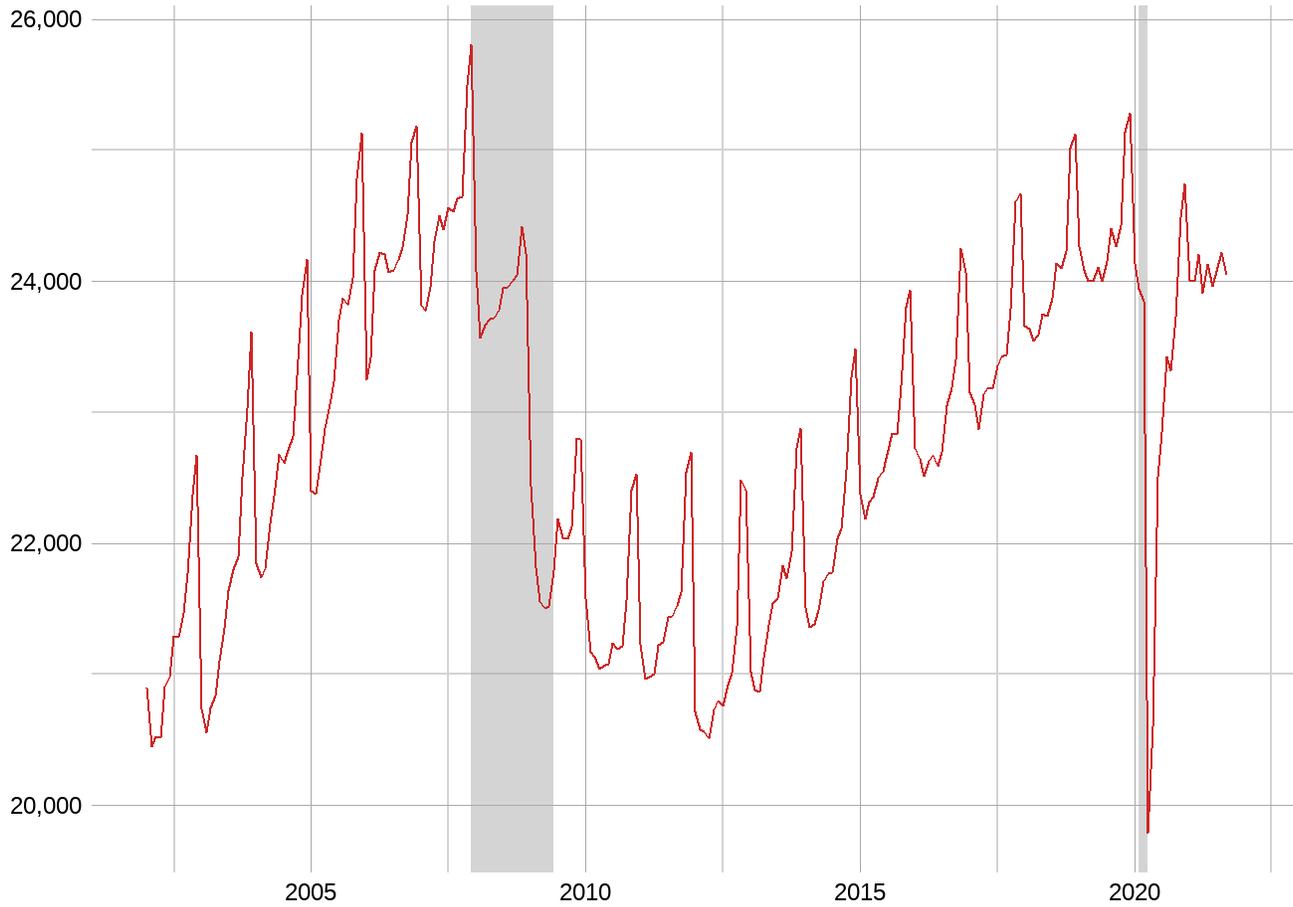

# Las Vegas Retail Employment

Las Vegas accounts for 10.8 percent of retail employment statewide for September 2021. For the period, 2011 to September 2022, it averages 11.4 percent of retail employment.

# Washoe County Retail Employment

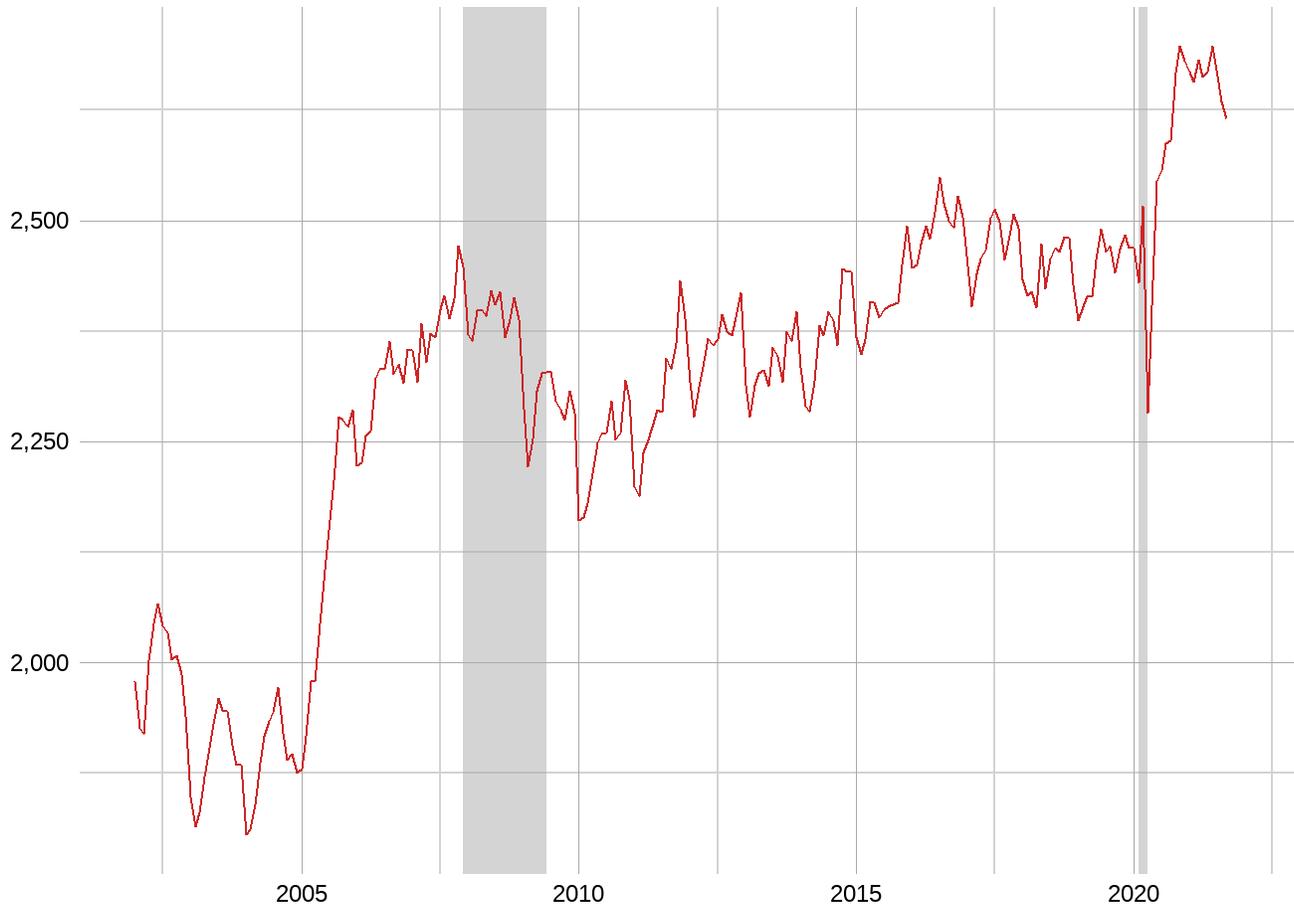

Much like the Las Vegas area, retail Employment in Washoe County had been trending up from April 2012 to December 2017 when it reached its peak at 24,670. In April 2020, in lieu of the pandemic, retail employment would fall to 19,788, decreasing by nearly 4,900 or 19.7 percent.

Retail jobs have increased by X percent

# Elko County Retail Employment

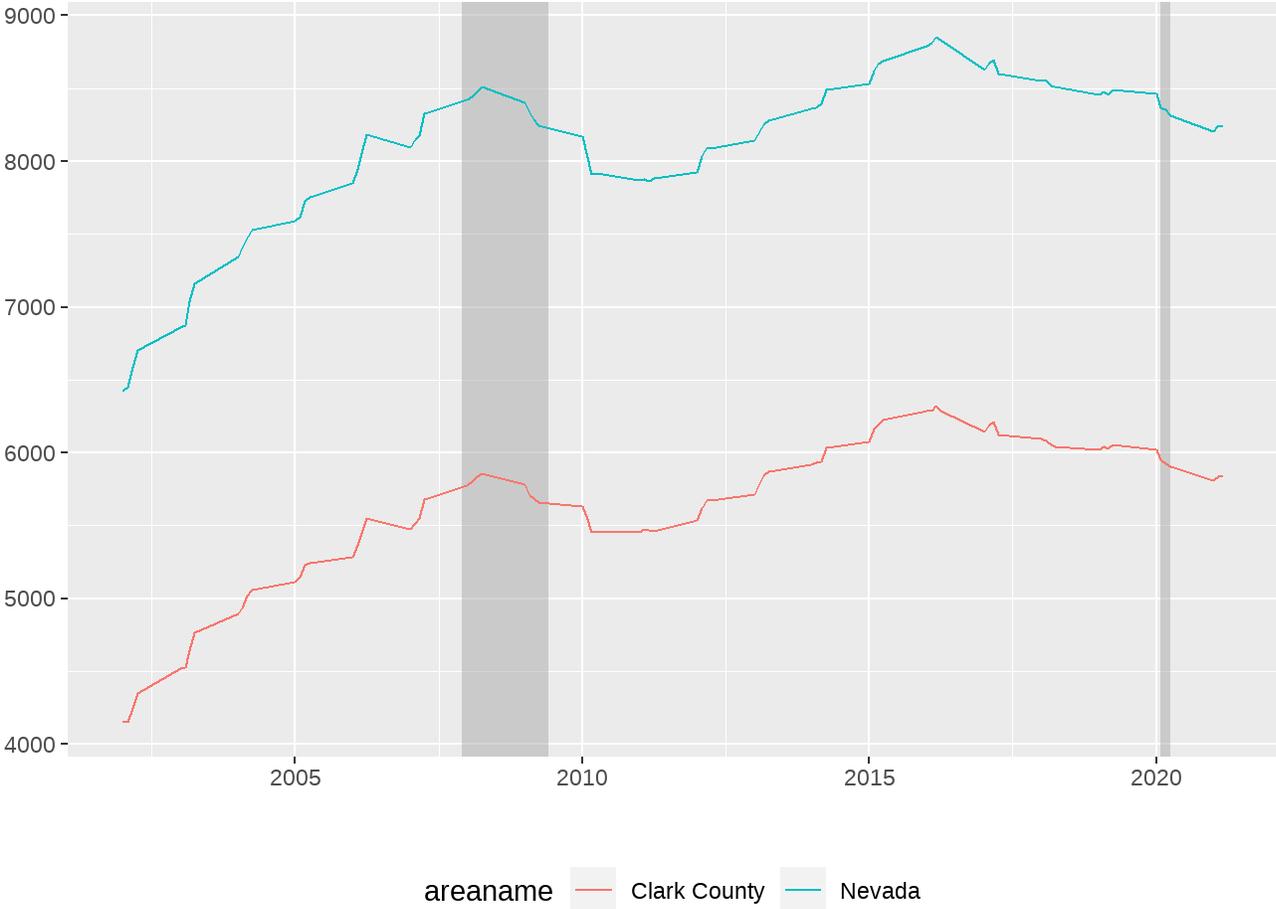

Elko County experienced slightly different retail employment patterns than its Silver State counterparts; Clark and Washoe. Starting in January 2005, retail employment mostly trended up or was stable. Much like all regions in Nevada, they saw a decline in April 2020. In Elko County, the decline in retail employment was 234 or 9.3%. Since then they have more than recovered all of the lost employment. June 2021 saw a new high of 2,697 in retail.

Retail jobs have increased by X percent

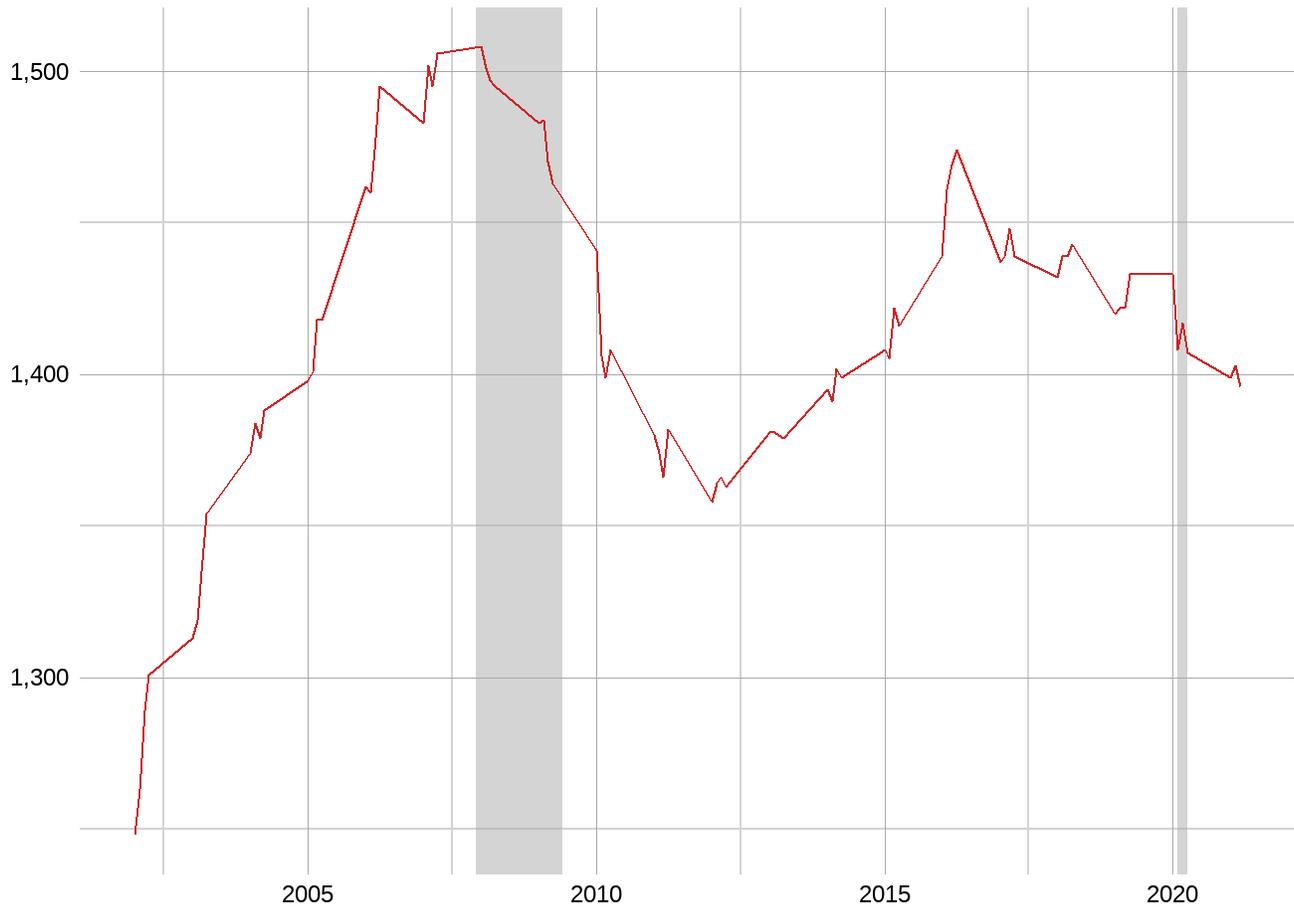

# Number of Retail Establishment in Nevada

Retail employment is usually quite seasonal but the number of establishments is a bit more consistent. Number of retail establishments in Nevada reached its peak in first quarter of 2016 at 8,790 establishments while in Clark County, that peak was reached in third quarter of 2016 at 6,320 establishments. Since peaking, both State of Nevada and Clark County have decline to the most recent levels of 8,239 and 5,845 respectively.

# Number of Retail Establishment in Washoe County

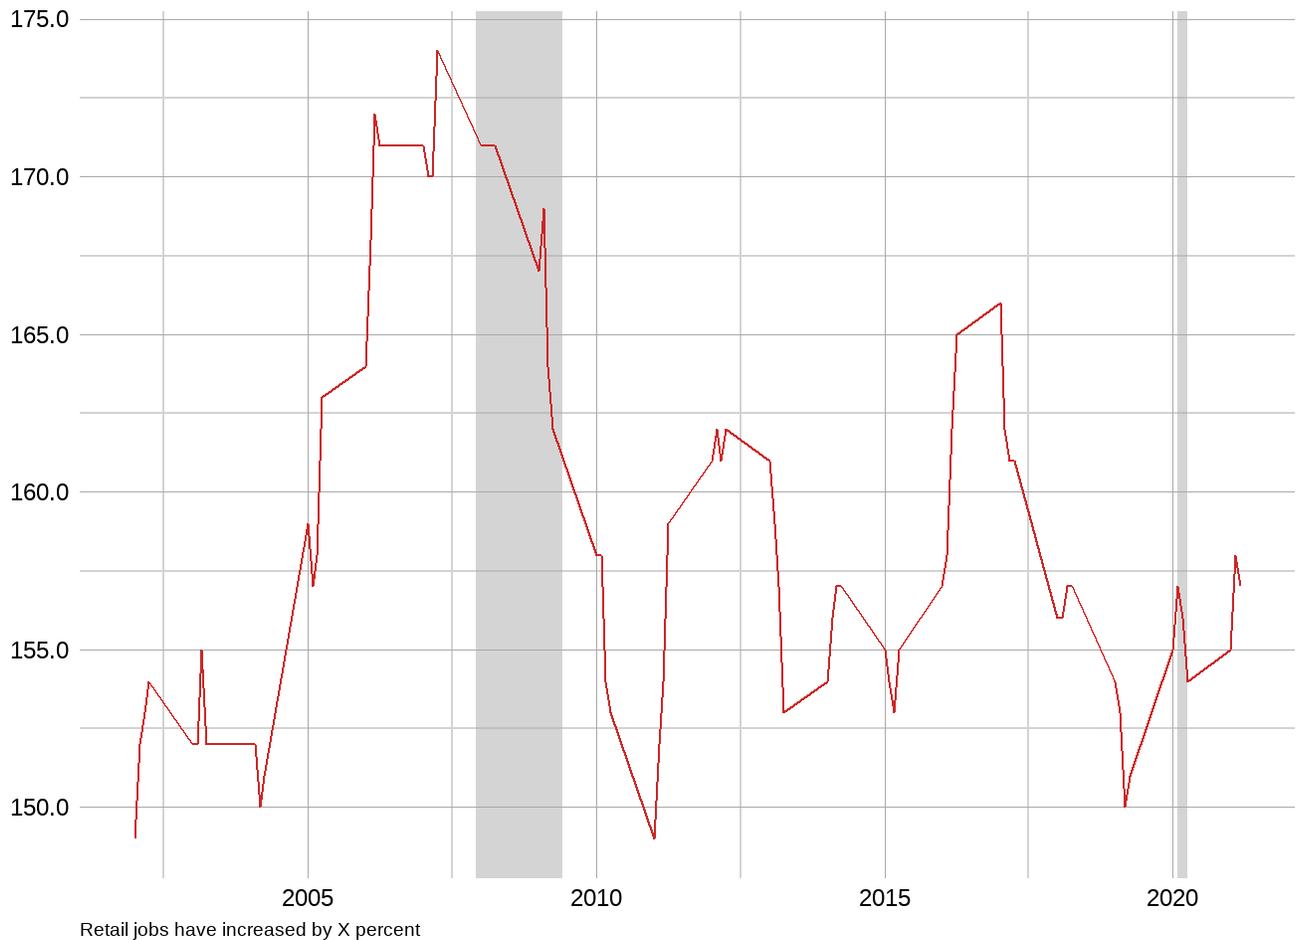

Washoe County experienced a marked increase from 2002 to first quarter of 2008 when it would reach its peak of 1,508. Since reaching this peak, the number of retail establishment has mostly declined with the the exception of an increase to 1,474 in fourth quarter of 2016.

Retail jobs have increased by X percent

# Number of Retail Establishment in Elko County

The number of retail establishments in Elko County reached its peak level at 174 in fourth quarter of 2007. After this, the number would decrease by 25 or roughly 14% to 149 in first quarter of 2011. Since that time, the number of retail establishments has fluctuated but trending up overall.

## Average Weekly Wage in Retail Sector by Area

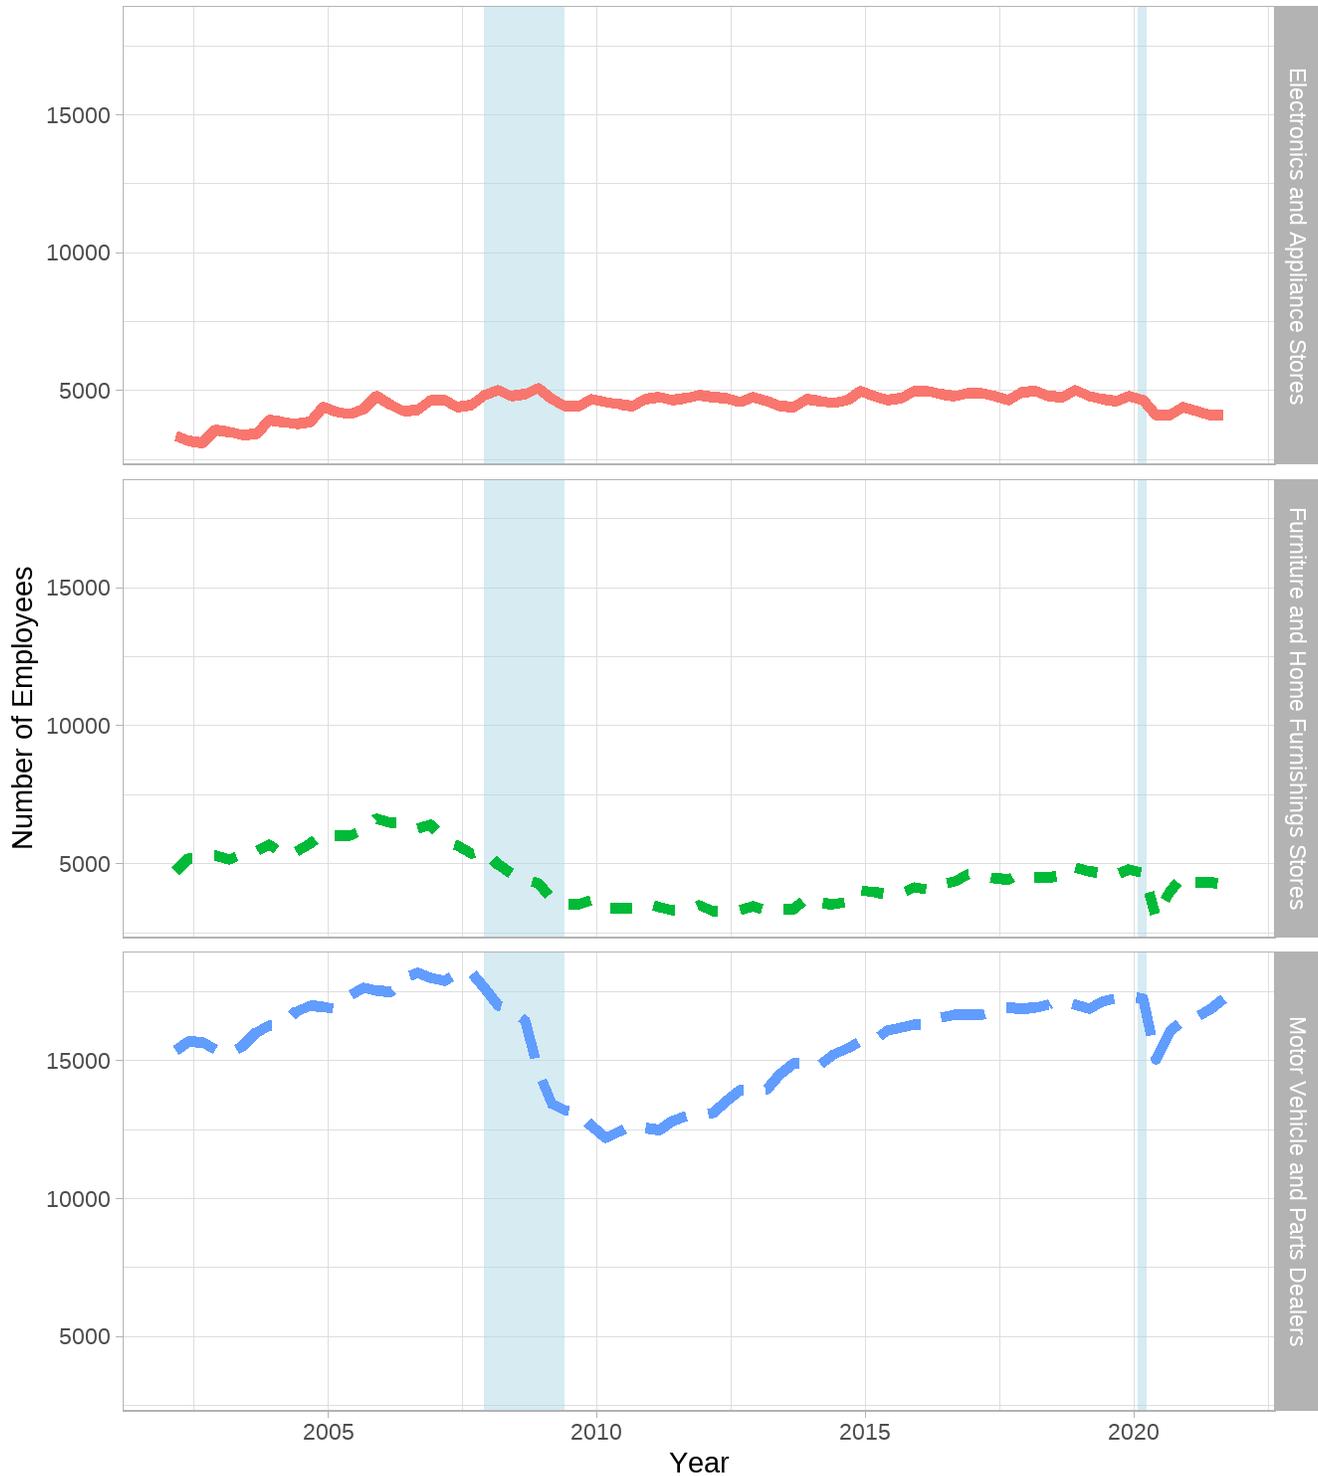

Average weekly wages in the retail industry have been on a steady increase statewide as well in Clark County, Elko County, and Washoe County. As of first quarter of 2002, the average weekly wage in the retail industry was 471.5. As of third quarter of 2021, the average weekly wage in that industry is \$748.5. This represents an increase of \$277 or a 58.7% increase.

# Ecommerce

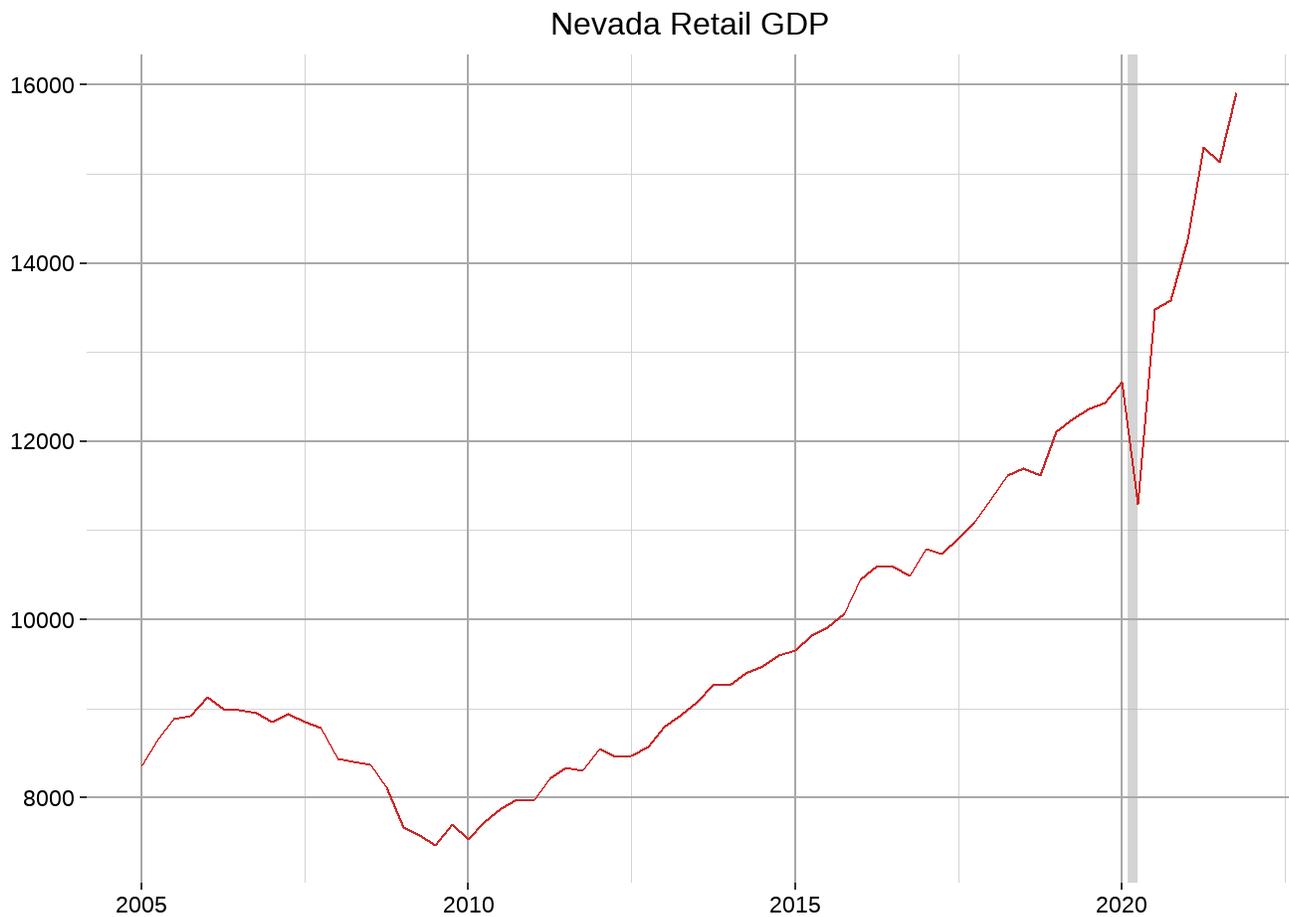

In light of the pandemic, Ecommerce became a greater part of society's lives. It had been mostly on the increase nationally since 2001. From first quarter of 2020 to second quarter of 2020, the amount of retail sales rose by \$49.3 million or 31.9%. This was the single largest quarterly increase since the data began being tracked in 2001. Since then it has continued to increase to its most recent level of \$214.6 billion.

Seasonally Adjusted E-Commerce Sales: United States. Measured in Millions of Dollars

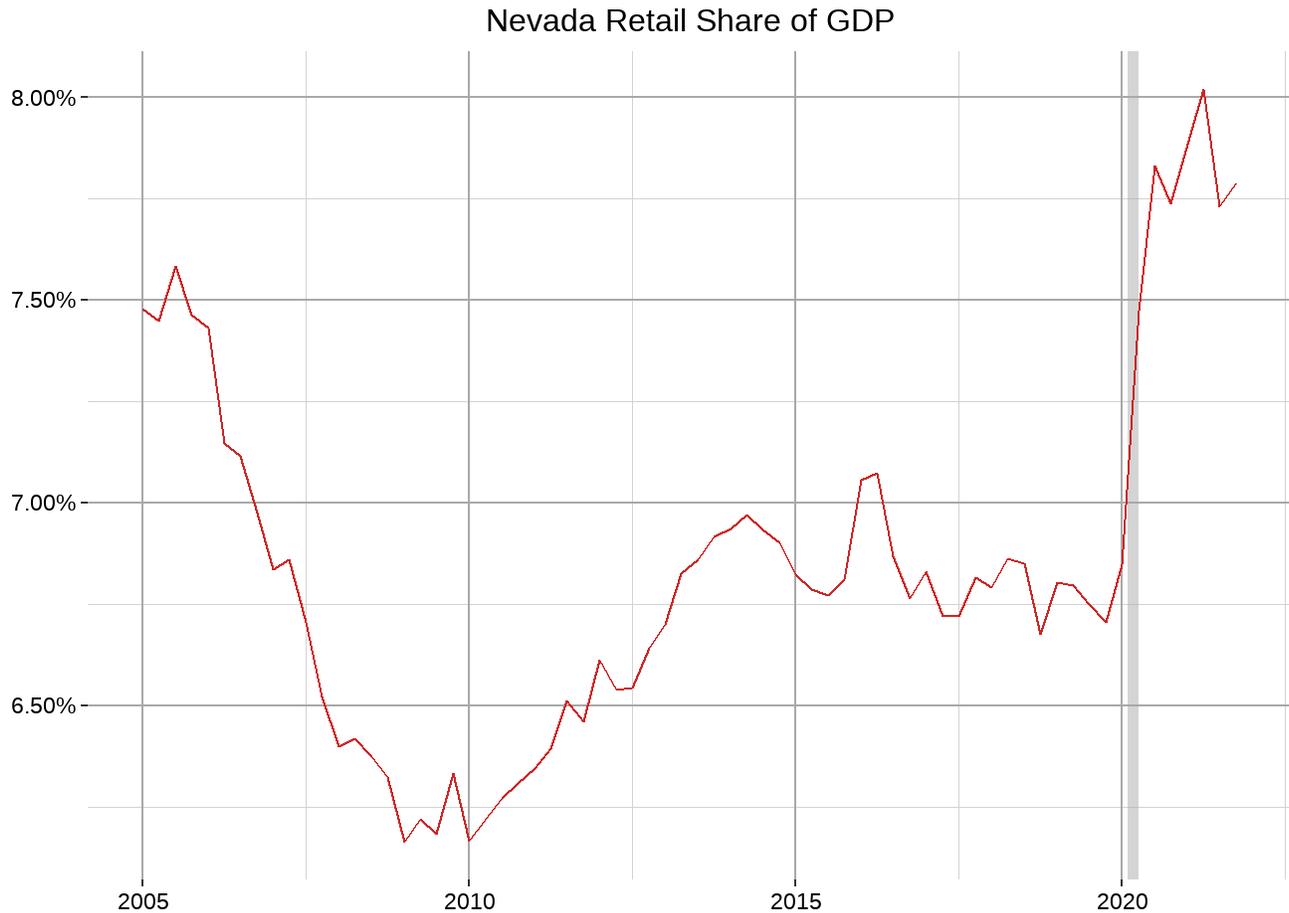

# Nevada Retail GDP

Gross Domestic product (GDP) is the value of final goods and services produced in a given geography over a fixed period of time. Retail GDP is calculated as the value of retail sales minus the cost of goods sold. From 2009 to 2020, retail GDP in the Silver State had been increasing steadily. In second quarter of 2020, this would decrease by nearly 1.4 billion or 10.8%. Since that time, retail GDP has risen to its most current reported level of 15,913,700,000 which is a record high.

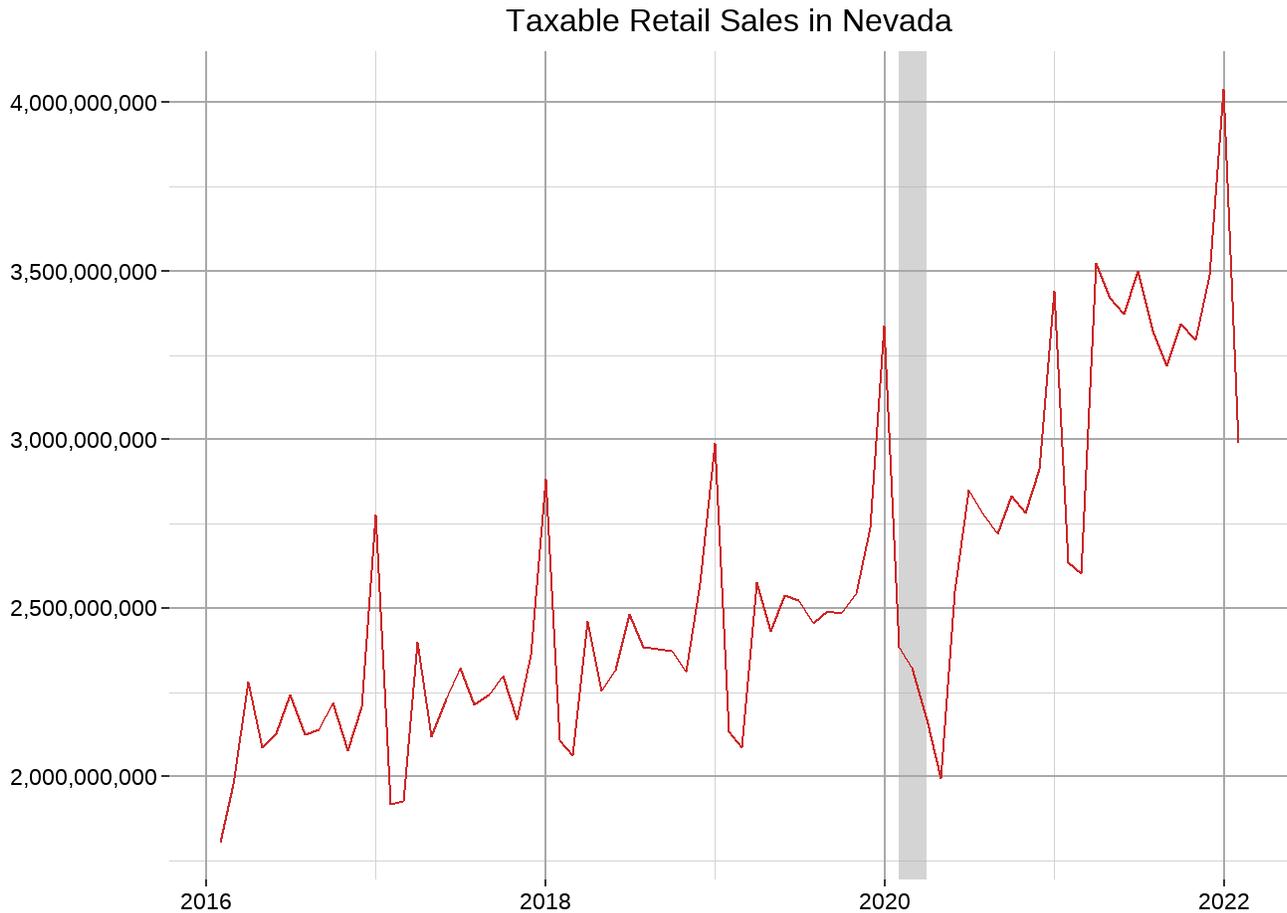

## Retail GDP as a share of Total GDP

Retail GDP as a share of total GDP had been remaining somewhat constant at roughly 6.8 from first quarter of 2015 to first quarter of 2020. By second quarter of 2021, this would rise to 8.1 percent.

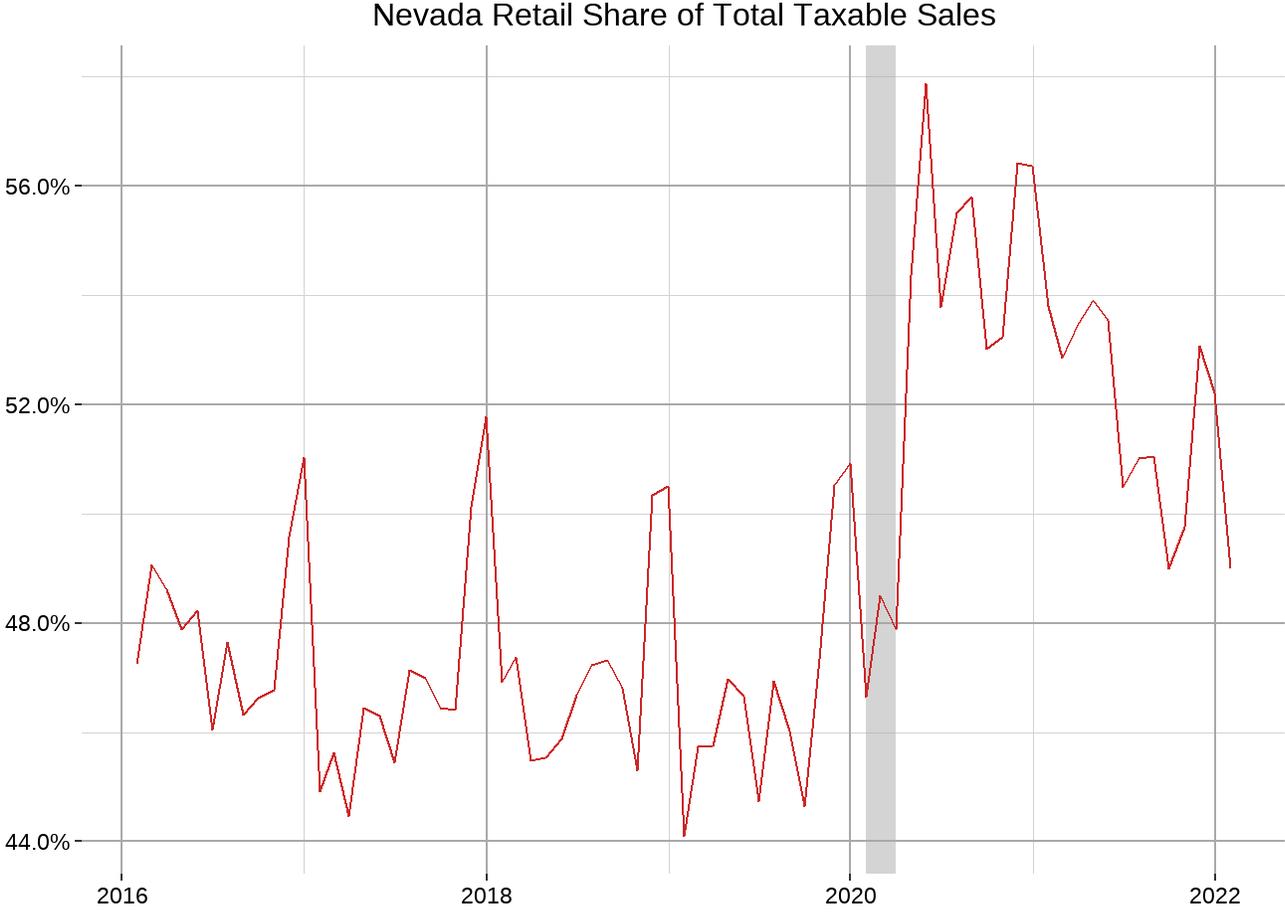

# Retail Sales in Nevada

Taxable retail sales have been trending up since 2016. Retail sales fell from a then record high of 3.44 billion to 1.99 Billion in April 2020, a decrease of 40.2 percent. Since that time, retail sales have mostly risen to its current level of 2.98 billion.

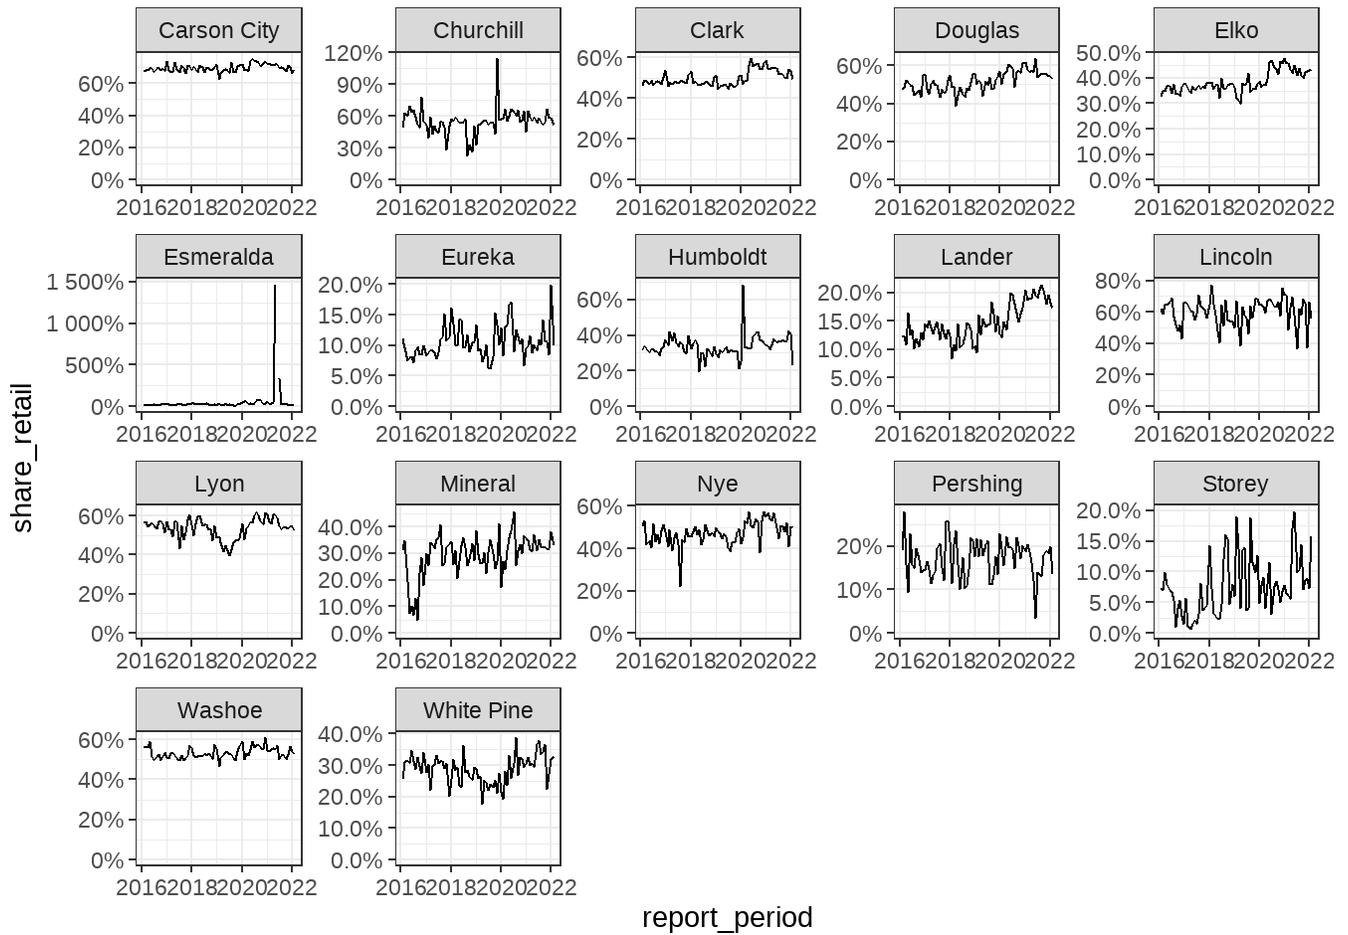

# Retail Share of Total Taxable Sales in Nevada

The retail share of total taxable sales reached its peak in May 2020 at 57.8 percent. Since that time, it has mostly declined to its most current reported level of 48.9 percent.

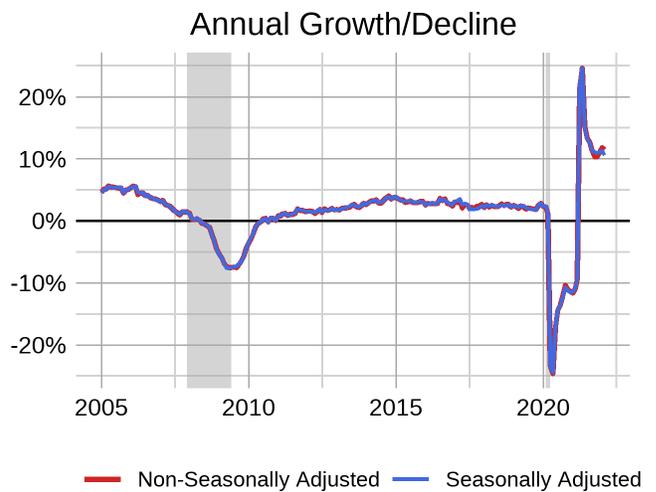

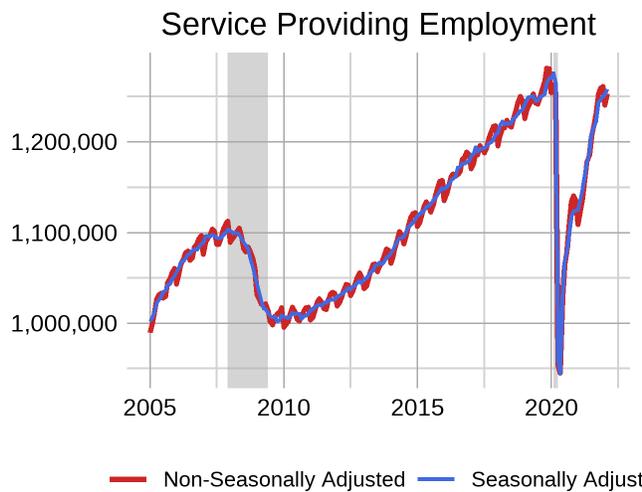

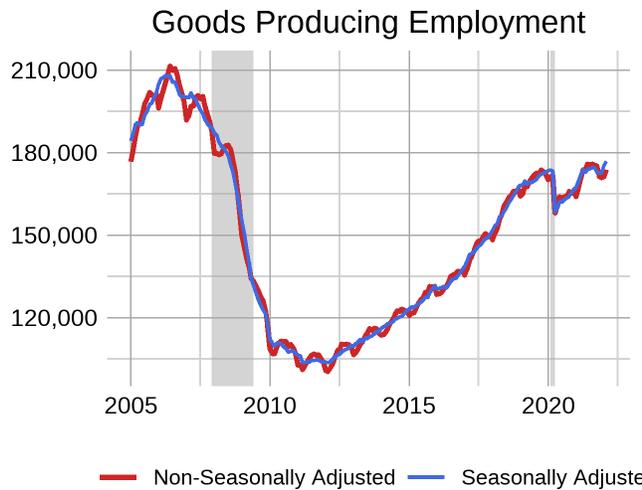

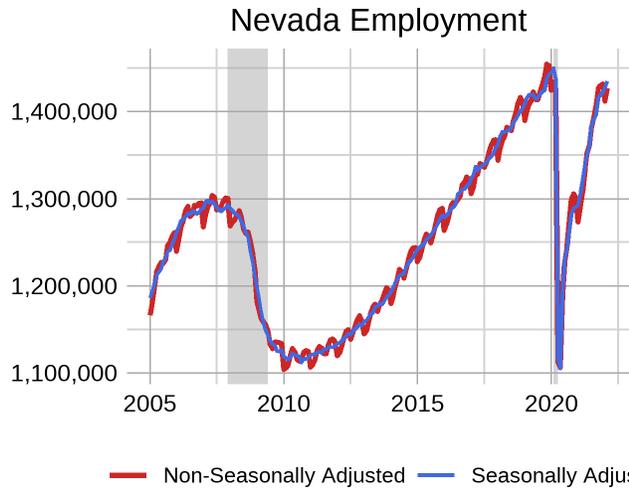

# Retail Share of Total Taxable Sales by County
